

Amazon's vision is to be Earth's most customer-centric company. Our goal isn't simply to make things accessible, but to make products, services, and experiences that are delightful for customers with disabilities.

Customers can enjoy a rich set of accessibility features on Amazon devices, such as the award-winning VoiceView screen reader on Fire TV, Fire tablets, and Echo Show devices. They can also enjoy Fire tablets' compatibility with Bluetooth refreshable braille displays and use Alexa for things like identifying pantry items, shopping, and controlling smart home appliances by voice and touch.

To learn more, tune in to our sessions featuring Peter Korn, Director of Devices Accessibility, Dr. Josh Miele, Principal Accessibility researcher for Devices and 2021 MacArthur Grant fellow, and other Amazon innovators.
